

QUESTIONNAIRE

concerning the issuance of amateurs' certificates and licences in electronic format

Each CEPT Administration is invited to express their opinions on the following issues:

1. Does your Administration take into consideration the issuance of the amateurs' certificates and licences in electronic format? If yes, please provide further information.

Yes No

Details:

Yes on the issuance of licences. We issue licenses in electronic format through our Client Portal. If requested, a license can also be sent in paper format. No in terms of issuance of certificates due to security issues and reliability.
--

2. Does your Administration agree with such an electronic format, and even if you do not intend to use it, will your Administration recognize such documents issued by other CEPT Administrations? If yes, please provide further information.

Yes No

Details:

We will work in accordance with CEPT recommendations.

3. In your opinion, what is the file format that is more suited for issuing these documents in electronic format? Furthermore, what document security method do you consider is more appropriate? Please provide a short description of the advantages offered by them.

Yes No

Details:

The licence we issue is available in our Client Portal and can be shown to everyone. The certificate must contain some security measures like a Watermark. In our opinion that would be difficult in an electronic document, unless there is also some sort of digital verification in a government portal.
--

4. In your opinion, could it be useful to include a QR code in the electronic format? If you deem such a code a good idea, please suggest alternative barcodes that could be included.

Yes

No

Details:

No opinion at this moment.

5. Does your Administration support this initiative at CEPT level, for the migration to digitally signed documents to be accomplished in a timely and effective manner?

Yes

No

Details:

Yes, as long as security issues are fulfilled.
